ARNIKA TINCTURE

APPLICATION

To be used as a massage liniment for the horse's muscles, joints, and tendons. Gel formulation ensures easy and smooth application.

- Deep-acting liniment gel
- Effortless and smooth application
- Excellent massage liniment for muscles

Eclipse Biofarmab Arnika Gel, featuring genuine arnica tincture in a gel foundation, offers a lightweight texture for effortless massaging. It serves as an ideal massage liniment for the horse's extensive muscle areas, including the upper and lower back as well as the buttocks, and is equally effective for joints, tendons, and ligaments.

Arnica contains Arnica Montana and Arnica Mexicana. Arnica is a perennial herb belonging to the Asteraceae family. It is a validated remedy traditionally used to dilate blood vessels and enhance blood circulation to muscles and tissues.

Arnica itself does not generate warmth; however, its application via massage stimulates blood flow, thereby elevating muscle temperature. Additionally, it is beneficial to use a blanket post-treatment to retain the generated warmth.

Most commonly, it is used to treat strained, sore, and overworked muscles, as well as sprains and swelling. However, it is equally effective when used preventatively.

Avoid applying to open wounds or damaged skin to prevent irritation.

Eclipse Biofarmab's range includes Arnika and Arnika Gel, each featuring a high concentration of extract for optimal effectiveness.

INSTRUCTIONS FOR USE

Thoroughly massage the arnica gel into the affected area. Bandage the area if feasible.

Helpful suggestion: Massaging arnica into the area behind the saddle after riding can accelerate muscle recovery and help prevent potential tension.

For external use only.

COMPOSITION

Arnica extract of Arnica Montana and Arnica Mexicana, Gel Foundation.

SHELF LIFE

36 months.
