hollow of the heel

WOUND CARE

APPLICATION

To be used for the care of minor wounds and to promote a healthy hollow of the heel.

- Moisturising ointment
- For mud fever and minor wounds
- Crafted from a trusted formula

Eclipse Biofarmab Zinc Ointment is a softening ointment enriched with almond oil and lanolin, designed to treat minor wounds and prevent mud fever.

Zinc dries out the affected areas while almond oil and lanolin protect and soften irritated skin.

Vitamin A promotes skin cell growth and repair, and fortifies the skin's defense against infections, boasting anti-inflammatory properties. Vitamin D bolsters cellular function, enhances the skin's immune defenses, and mitigates inflammation. The combined action of Vitamins A and D creates an ideal environment for wound healing and skin well-being.

The natural lavender oil lends a delightful fragrance and provides deep moisture for the skin. Lavender oils gentle and soothing aroma has earned it popularity in stress-relief aromatherapy practices.

Crafted from a trusted formula.

INSTRUCTIONS FOR USE

Clean the affected area thoroughly. Dry with a clean towel. Apply a thin layer of the ointment.

Can be repeated several times a day until the wound has healed.

For external use only.

If you have any doubts about wound treatment, consult a veterinarian.
