ANTI-ITCH LOTION

APPLICATION

Use to be used for preventing and soothing irritated skin on horses troubled by itching.

- Natural ingredients
- Can prevent itching
- For use on sensitive skin

Eclipse Biofarmab No Itch is a soothing lotion crafted from natural ingredients, meticulously chosen to provide maximum relief and care for horses' sensitive skin, featuring the natural extracts of calendula and chamomile.

It is specifically designed to prevent and alleviate skin irritation, such as in the mane and tail root, in horses affected by itching due to insect bites, wounds, mild sunburn, or sun eczema.

The inclusion of calendula, renowned for its anti-inflammatory and antiseptic qualities, aids in soothing and healing the skin. Chamomile adds to this with its moisturising properties, making the lotion exceptionally suitable for irritated and sensitive skin.

This lotion is easy to apply, absorbing quickly into the skin without leaving a greasy residue, ensuring comfort for both the horse and the handler. Its mild formulation allows for regular use.

INSTRUCTIONS FOR USE

Wash the area thoroughly with a mild, unscented shampoo, e.g. Mild Shampoo.

Shake well before use.

Apply the lotion to the affected area and massage thoroughly. Repeat the treatment 1-2 times daily for at least three weeks.

Further use for maintenance: reduce use to 1-2 times a week.

COMPOSITION

Water, Calendula Oil, Preservative, Thickener, Chamomile Extract.

SHELF LIFE

36 months.
